

Robust Control for Uncertain Networked Control Systems with Random Delays [

Huang, Dan

Springer London,
2009

Monografía

"Robust Control for Uncertain Networked Control Systems with Random Delays" addresses the problem of analysis and design of networked control systems when the communication delays are varying in a random fashion. The random nature of the time delays is typical for commercially used networks, such as a DeviceNet (which is a controller area network) and Ethernet network. The main technique used in this book is based on the Lyapunov-Razumikhin method, which results in delay-dependent controllers. The existence of such controllers and fault estimators are given in terms of the solvability of bilinear matrix inequalities. Iterative algorithms are proposed to change this non-convex problem into quasi-convex optimization problems, which can be solved effectively by available mathematical tools. Finally, to demonstrate the effectiveness and advantages of the proposed design method in the book, numerical examples are given in each designed control system

Título: Robust Control for Uncertain Networked Control Systems with Random Delays Recurso electrónico-En línea] by Dan Huang, Sing Kiong Nguang

Editorial: London Springer London 2009

Descripción física: digital

Tipo Audiovisual: Engineering Operating systems (Computers) Systems theory Engineering mathematics Control engineering systems Telecommunication Engineering Control , Robotics, Mechatronics Systems Theory, Control Performance and Reliability Appl.Mathematics/Computational Methods of Engineering Communications Engineering, Networks

Mención de serie: Lecture Notes in Control and Information Sciences 0170-8643 386

Documento fuente: Springer eBooks

Nota general: Engineering (Springer-11647)

Contenido: Introduction -- Modeling of Networked Control Systems -- PART I: Linear Uncertain Networked Control Systems -- State Feedback Control of Uncertain Networked Control Systems -- Dynamic Output Feedback Control for Uncertain Networked Control Systems -- Robust Disturbance Attenuation for Uncertain Networked Control Systems -- Robust Filter Design for Uncertain Networked Control Systems -- Robust Fault Estimator

Design for Uncertain Networked Control Systems -- PART II: Nonlinear Uncertain Networked Control Systems -- Takagi-Sugeno Fuzzy Control System -- State Feedback Control for Uncertain Nonlinear Networked Control Systems -- Dynamic Output Feedback Control for Uncertain Nonlinear Networked Control Systems -- Robust Disturbance Attenuation for Uncertain Nonlinear Networked Control Systems -- Robust Fuzzy Filter Design for Uncertain Nonlinear Networked Control Systems -- Fault Estimation for Uncertain Nonlinear Networked Control Systems -- Conclusions -- Appendix: Mathematical and Background Knowledge

Restricciones de acceso: Accesible sólo para usuarios de la UPV

Tipo recurso electrónico: Recurso a texto completo

Detalles del sistema: Forma de acceso: Web

ISBN: 9781848826786 978-1-84882-678-6

Autores: Nguang, Sing Kiong

Entidades: SpringerLink (Servicio en línea)

Enlace a formato físico adicional: Printed edition 9781848826779

Punto acceso adicional serie-Título: Lecture Notes in Control and Information Sciences 0170-8643 386
