

Alternative destines

DAMDI,
2013

Monografía

Presented in reverse chronological order, this selection of projects follows the Rome-based practice from its most recent finished buildings and competition entries to its early concepts and collaborations. Founded in 2006, 2A+P/A is active in architectural and landscape design, and known for its particular interest in the nature and conditions of public space. From a design for the Bauhaus Museum, Weimar, and the Contemporary Art Museum, Maribor, to a primary school in Herat, Afghanistan, and a self-sufficient housing prototype, it is colourfully and playfully illustrated throughout. With texts by Luca Molinari, Peter T. Lang and Andrea Branzi, plus an interview by Luca Galofaro
