Monografía

This book presents a collection of extended contributions on the physics and application of optoelectronic materials and metamaterials. The book is divided into three parts, respectively covering materials, metamaterials and optoelectronic devices. Individual chapters cover topics including phonon-polariton interaction, semiconductor and nonlinear organic materials, metallic, dielectric and gyrotropic metamaterials, singular optics, parity-time symmetry, nonlinear plasmonics, microstructured optical fibers, passive nonlinear shaping of ultrashort pulses, and pulse-preserving supercontinuum generation. The book contains both experimental and theoretical studies, and each contribution is a self-contained exposition of a particular topic, featuring an extensive reference list. The book will be a useful resource for graduate and postgraduate students, researchers and engineers involved in optoelectronics/photronics, quantum electronics, optics, and adjacent areas of science and technology

Título: Contemporary Optoelectronics Materials, Metamaterials and Device Applications edited by Oleksiy Shulika, Igor Sukhoivanov

Edición: 1st ed. 2016

Editorial: Dordrecht Springer Netherlands Imprint: Springer 2016

Descripción física: 1 recurso en línea X, 234 p. 121 illus., 66 illus. in color

Mención de serie: Springer Series in Optical Sciences 0342-4111 199 Springer eBooks

Contenido: From the Contents: Advanced Optoelectronics -- III-V Nanowires for Optoelectronic Applications -- Advances in Optoelectronic Approaches for Wideband and Programmable Processing of Ultrafast Signals -- From Order to Chaos and back: a High-Level Coupling Approach for Cryptography of Transmitted Data

Detalles del sistema: Modo de acceso: World Wide Web

ISBN: 9789401773157 978-94-017-7315-7

Materia: Physics Optics Optoelectronics Plasmons (Physics) Microwaves Optical engineering Optical materials Electronic materials Physics Optics, Optoelectronics, Plasmonics and Optical Devices Optical and Electronic Materials Microwaves, RF and Optical Engineering
