Monografía

Howler monkeys (genus Alouatta) comprisetwelve species of leaf-eating New World monkeys that range from southern Mexico through northern Argentina. This genus is the most widespread of any New World primate taxa, and can be found to inhabit a range of forest types from undisturbed rainforest to severely anthropogenically impacted forest fragments. Although there have been many studies on individual species of howler monkeys, this book is the first comprehensive volume to place information on howler behavior and biology within a theoretical framework of ecological and social adaptability. Thisis the second of two volumes devoted to the genus Alouatta. This volume: Examines behavioral and physiological mechanisms that enable howler monkeys to exploit highly disturbed and fragmented habitats Presents models of howler monkey diet, social organization, and mating systems that can alsoinform researchers studyingOld World colobines, apes, and other tropical mammals These goals are achieved in a collection of chapters written by a distinguished group of scientists on the feeding ecology, behavior, mating strategies, and management and conservation of howlers. Thisbook also contains chapters on the howler microbiome, the concept of behavioral variability, sexual selection, and the role of primates in forest regeneration

Título: Howler Monkeys Recurso electrónico] Behavior, Ecology, and Conservation edited by Martín M

Kowalewski, Paul A Garber, Liliana Cortés-Ortiz, Bernardo Urbani, Dionisios Youlatos

Editorial: New York [etc.] Springer

Descripción física: XIX, 440 p. 53 il., 20 il. en color

Mención de serie: Developments in Primatology: Progress and Prospects

Contenido: PART 1. INTRODUCTION -- Chapter 1. Why is it Important to Continue Studying the Behavioral

Ecology and Conservation Management of Howler Monkeys? -- PART

Detalles del sistema: Modo de acceso: Word Wide Web Modo de acceso: World Wide Web

Fuente de adquisición directa: Springer (e-Books)

ISBN: 9781493919604 9781493919598

Autores: Kowalewski, Martín M Garber, Paul A Cortés-Ortiz, Liliana Urbani, Bernardo Youlatos, Dionisios

Punto acceso adicional serie-Título: Developments in Primatology: Progress and Prospects
