 Biochemical Engineering Applied Microbiology

Monografía

This book review series presents current trends in modern biotechnology. The aim is to cover all aspects of this interdisciplinary technology where knowledge, methods and expertise are required from chemistry, biochemistry, microbiology, genetics, chemical engineering and computer science. Volumes are organized topically and provide a comprehensive discussion of developments in the respective field over the past 3-5 years. The series also discusses new discoveries and applications. Special volumes are dedicated to selected topics which focus on new biotechnological products and new processes for their synthesis and purification. In general, special volumes are edited by well-known guest editors. The series editor and publisher will however always be pleased to receive suggestions and supplementary information. Manuscripts are accepted in English

Título: Bioreactor Engineering Research and Industrial Applications I [Recurso electrónico] Cell Factories edited by Qin Ye, Jie Bao, Jian-Jiang Zhong

Mención de serie: Advances in Biochemical Engineering/Biotechnology 155

Contenido: Cost-effective synthesis of chiral chemicals using data-mined enzymes -- Metabolic regulation of bacterial cells -- Cell factories for microbial diols -- Construction of Escherichia coli cell factories for production of bulk chemicals -- Microbial Cell Factories for Production of Long Chain Alcohols -- Yeast cell factories based on surface engineering -- Cell factories of higher fungi for useful metabolite production -- Role of Microbial Communities in Petroleum Reservoirs

Restricciones de acceso: Acceso restringido a miembros del Consorcio de Bibliotecas Universitarias de Andalucía

Detalles del sistema: Modo de acceso: world wide web

Fuente de adquisición directa: Springer (e-Books)

ISBN: 9783662491614 9783662491591

Autores: Ye, Qin Bao, Jie Zhong, Jian-Jiang
