Monografía

Multifunctional Polymeric Nanocomposites Based on Cellulosic Reinforcements introduces the innovative applications of polymeric materials based on nanocellulose, and covers extraction methods, functionalization approaches, and assembly methods to enable these applications. The book presents the state-of-the-art of this novel nano-filler and how it enables new applications in many different sectors, beyond existing products. With a focus on application of nano-cellulose based polymers with multifunctional activity, the book explains the methodology of nano-cellulose extraction and production and shows the potential performance benefits of these particular nanostructured polymers, for applications across different sectors, including food active packaging, energy-photovoltaics, biomedical, and filtration. The book describes how the different methodologies, functionalization, and organization at the nano-scale level could contribute to the design of required properties at macro level. The book studies the interactions between the main nano-filler with other active systems and how this interaction enables multi-functionality in the produced materials. The book is an indispensable resource for the growing number of scientists and engineers interested in the preparation and novel applications of nano-cellulose, and for industrial scientists active in formulation and fabrication of polymer products based on renewable resources

Título: Multifunctional polymeric nanocomposites based on cellulosic reinforcements [Recurso electrónico-En línea] edited by Debora Puglia, Elena Fortunati, Jose Maria Kenny

Editorial: Kidlington, Oxford, United Kingdom William Andrew is an imprint of Elsevier 2016

Descripción física: 1 online resource

Tipo Audiovisual: Nanostructured materials Cellulose Cellulose. Nanostructured materials. Electronic books

Mención de serie: Plastics design library

Nota general: Includes index

Restricciones de acceso: Accesible sólo para usuarios de la UPV

Tipo recurso electrónico: Recurso a texto completo

Detalles del sistema: Forma de acceso: Web

Fuente de adquisición directa: Elsevier. Suscripción

Copyright/Depósito Legal: 958350178. 958479052. 959330084. 961001283. 961207356

ISBN: 9780323442480 print) 032344248X print) 9780323417396 0323417396

Autores: Puglia, Debora, editor Fortunati, Elena, editor Kenny, J. (Jose), editor

Entidades: ScienceDirect (Servicio en línea)

Enlace a formato físico adicional: Original 9780323442480 032344248X

Punto acceso adicional serie-Título: PDL handbook series
