Monografía

In recent years there has been a sea change in the way much of the world thinks about and uses libraries. Young librarians and seasoned LIS professionals alike are experiencing increasing pressure to adjust to new economic, societal, and technological demands amidst the often-dire rhetoric currently surrounding the future of our institutions. Gorman reconnects readers with the core values that continue to inspire generations of library professionals and scholars while making the case that these values are doubly crucial to hold on to in the brave new shifting world of librarianship
