

Fisheries Management and Global Warming [Effects of climate change on fisheries in the Arctic Region of the Nordic countries /

Eide, Arne,
Ese, Ann-Christin,
Hoel, Alf Hakon (1957-)

Nordic Council of Ministers,
[2014]

Monografía

The FIMAGLOW project is a Nordic project with the aim to study possible drivers and impacts of global warming on Arctic fisheries. Two workshops has been held, serving to identify the relevant set of institutions and people, updating the research community on on-going research projects and initiatives in this realm, and pointing to some critical issues for further research. The material presented in the workshops is collected in this report, which hopefully then may serve as a stepping stone for further explorations of this important issue. A web site for the FIMAGLOW program has been set up and is available at the URL: <http://fimaglow.maremacentre.com>. The website includes program information and tentative programs for the workshops. MaReMA Centre at Norwegian College of Fisheries Science is organizing the program, Alf Hakon Hoel and Arne Eide being the project managers
