2016

Monografía

Fungal nanobiotechnology has emerged as one of the key technologies, and an eco-friendly, as a source of food and harnessed to ferment and preserve foods and beverages, as well as applications in human health (antibiotics, anti-cholesterol statins, and immunosuppressive agents), while industry has used fungi for large-scale production of enzymes, acids, biosurfactants, and to manage fungal disease in crops and pest control. With the harnessing of nanotechnology, fungi have grown increasingly important by providing a greener alternative to chemically synthesized nanoparticles

Título: Advances and Applications Through Fungal Nanobiotechnology Recurso electrónico-En línea] edited by Ram Prasad

Editorial: Cham Springer International Publishing Imprint: Springer 2016

Descripción física: XIII, 340 p. 72 illus., 48 illus. in color. online resource

Tipo Audiovisual: Life sciences Microbiology Mycology Life Sciences Mycology Microbiology

Mención de serie: Fungal Biology 2198-7777

Documento fuente: Springer eBooks

Nota general: Biomedical and Life Sciences (Springer-11642)

Contenido: 1. Understanding Mechanism of Fungus Mediated Nanosynthesis: A Molecular Approach -- 2. Innovation of Strategies and Challenges for Fungal Nanobiotechnology -- 3. Marine-Derived Fungi: Potential Candidates for Fungal Nanobiotechnology -- 4. Green Synthesis of Metal Nanoparticles by Fungi: Current Trends and Challenges -- 5. Microbial Enzymes: Current Features and Potential Applications in Nanobiotechnology -- 6. The Effect of Mycobiota on the Biointerface of Polyaniline Surface -- 7. Synthesis Techniques and Evaluation Methods of Nanoparticles as Fungicides -- 8. Plant Fungal Disease Management Using Nanobiotechnology as a Tool -- 9. Antifungal Products by Fungi in Food Nano-Packaging -- 10. Fungal Nanoparticles: An Emerging Tool in Medical Biology -- 11. Intervention of Fungi in Nano-Particle Technology and Applications. 12. Microbial

Laccases and Nanobiotechnology: Environmental Perspective -- 13. Polymer Inorganic Nanocomposites: A Sustainable Antimicrobial Agents -- 14. Advances in Bio-Botanicals Formulations with Incorporation of Nanotechnology in Intensive Crop Management -- 15. Nano-Biofungicides: Emerging Trend in Insect Pest Control -- 16. Nanocellulose Production Using Cellulose Degrading Fungi

Restricciones de acceso: Accesible sólo para usuarios de la UPV

Tipo recurso electrónico: Recurso a texto completo

Detalles del sistema: Forma de acceso: Web

ISBN: 9783319429908 978-3-319-42990-8

Autores: Prasad, Ram., editor

Entidades: SpringerLink (Servicio en línea)

Enlace a formato físico adicional: Printed edition 9783319429892
