Monografía

This collection of essays explores how Enlightenment and post-Enlightenment developments in the earth sciences and related fields (paleontology, mining, archeology, seismology, oceanography, evolution, etc.) impacted on contemporary French culture. They reveal that geological ideas were a much more pervasive and influential cultural force than has hitherto been supposed. From the mid-eighteenth century, with the publication of Buffon's seminal *Théorie de la Terre* (1749), until the early twentieth century, concepts and figures drawn from the earth sciences inspired some of the most important Fr
