Medical Microbiology

Infectious Diseases

Monografía

This book series focuses on current progress in the broad field of medical microbiology, and covers both basic and applied topics related to the study of microbes, their interactions with human and animals, and emerging issues relevant for public health. Original research and review articles present and discuss multidisciplinary findings and developments on various aspects of microbiology, infectious diseases, and their diagnosis, treatment and prevention. Advances in Microbiology, Infectious Diseases and Public Health is a subseries of Advances in Experimental Medicine and Biology, which has been publishing significant contributions in the field for over 30 years and is indexed in Medline, Scopus, EMBASE, BIOSIS, Biological Abstracts, CSA, Biological Sciences and Living Resources (ASFA-1), and Biological Sciences. 2015 Impact Factor: 1.953

Título: Advances in Microbiology, Infectious Diseases and Public Health [Recurso electrónico] Volume 7 edited by Gianfranco Donelli

Editorial: Cham Springer International Publishing Imprint: Springer 2017

Editorial: Cham Springer International Publishing 2017

Descripción física: VI, 138 p. 50 il., 20 il. col

Mención de serie: Advances in Microbiology, Infectious Diseases and Public Health 973

Bibliografía: Includes bibliographical references at the end of each chapters and index

Contenido: Chapter 1: Selection of lactic acid bacteria with probiotic potential isolated from the fermentation process of "cupuaçu" (*Theobroma grandiflorum*) -- Chapter 2: Effects of Fibronectin Coating on Bacterial and Osteoblast Progenitor Cells Adherence in a Co-culture Assay -- Chapter 3: Improving the Bacterial Recovery by Using Dithiothreitol with Aerobic and Anaerobic Broth in Biofilm-Related Prosthetic and Joint Infections -- Chapter 4: High Prevalence of Human Herpesvirus 8 Infection in Diabetes Type 2 Patients and Detection of a New Virus Subtype -- Chapter 5: Activity of Norspermidine on Bacterial Biofilms of Multidrug-Resistant Clinical

Isolates Associated with Persistent Extremity Wound Infections -- Factors Affecting Outcome of Tuberculosis in Children in Italy: An Ecological Study -- Chapter 6: Factors Affecting Outcome of Tuberculosis in Children in Italy: An Ecological Study -- Chapter 7: Genotyping and antifungal susceptibility of *Dipodascus capitatus* isolated in a neonatal intensive care unit of a Sicilian Hospital -- Chapter 8: The correlation between biofilm production and catheter related blood stream infections sustained by *Candida*. A case control study -- Chapter 9: Inhibition of Urease enzyme production and some other virulence factors expression in *Proteus mirabilis* by N-acetyl cysteine and dipropyl disulphide -- Chapter 10: Immunization with Streptococcal Heme Binding Protein (Shp) Protects Mice against Group A Streptococcus Infection -- Chapter 11: The public health impact of the so-called "Fluad effect" on the 2014/2015 influenza vaccination campaign in Italy: ethical implications for health-care workers and health communication practitioners

ISBN: 9783319607658 9783319607641 9783319607665 9783319869292

Materia: Microbiology Emerging infectious diseases Medical Microbiology Infectious Diseases Microbiology
