2010

Electronic books

Monografía

This collective volume explores clause-linkage strategies in a cross-linguistic perspective with greater emphasis on subordination. Part I presents some theoretical reassessment of syntactic terminologies and distinctive criteria for subordination, as well as typological methods based on sets of variables and statistics allowing cross-linguistic comparability. Part II deals with strategies relating to clause-chaining, conjunctive conjugations, converbial constructions, masdars. Part III centers on the interaction between the syntax, pragmatics, and semantics of clause-linking and subordination
