Monografía

This unique volume offers an up-to-date overview of all the main aspects of groundwater in the Nile Delta and its fringes, as well as latest research findings. The themes covered include: · Nile Delta aquifer formation and its characteristics · The use of the groundwater in the Nile Delta and its implications · Sedimentology and hydrogeophysical characteristics · Groundwater investigations and aquifer characterization using current direct resistivity and induced polarization · Groundwater contamination and degradation · Saltwater intrusion and its control · Delineation of groundwater flow and seawater intrusion using various techniques, including one-dimensional subsurface temperature profiles, geoelectrical resistivity, and integrated subsurface thermal regime and hydrogeochemical data · Modeling of groundwater and of saltwater intrusion in the Nile Delta aquifer · Excessive pumping and groundwater quality assessment for irrigation and drinking purposes · Groundwater management for sustainability in the Nile Delta. The volume appeals to postgraduate students, researchers, scientists, professionals, decision makers and planners

Título: Groundwater in the Nile Delta [Recurso electrónico] edited by Abdelazim M. Negm

Editorial: Cham Springer International Publishing 2019

Descripción física: XVII, 760 p. 376 il., 289 il. col

Mención de serie: The Handbook of Environmental Chemistry 73

ISBN: 9783319942834 9783319942827 9783319942841

Autores: Negm, Abdelazim M, ed. lit

Punto acceso adicional serie-Título: The Handbook of Environmental Chemistry 73
