Título: Advances in catalysis and related subjects. Volume 13 electronic resource] edited by D. D. Eley, P. W. Selwood, Paul B. Weisz

Editorial: New York London Academic Press 1962

Descripción física: 1 online resource (473 p.)

Mención de serie: Advances in catalysis and related subjects v. 13

Nota general: Description based upon print version of record

Bibliografía: Includes bibliographical references and indexes

Contenido: Front Cover; Advances in Catalysis: and Related Subjects; Copyright Page; Contents; Contributors; Preface; Professor W. E. Garner; Chapter 1. Chemisorption and Catalysis on Metallic Oxides; I. Introduction; II. The Adsorption and Oxidation of Carbon Monoxide; III. The Uptake of Oxygen by Metals and Metallic Oxides; IV. The Emergence and Significance of the Electronic Factor; V. Adsorption and Catalysis on Doped Oxides; VI. Photoadsorption and Photocatalysis; VII. Conclusion; References; Chapter 2. Radiation Catalysis; I. Introduction II. Experimental Studies of Some Irradiated Heterogeneous Systems III. General Degradation Scheme of Radiation Energy in Solids; IV. Radiation Catalysis; V. Some Comments About the Experimental Results; VI. General Conclusion; Appendix; References; Chapter 3. Polyfunctional Heterogeneous Catalysis; I. Introduction; II. Principles of Polystep Catalysis; III. The Technique of Physically Mixed Catalyst Components; IV. Some Major Polystep Reactions of Hydrocarbons; V. The Petroleum Naphtha "Reforming" Reaction; VI. Other Polystep Reactions; VII. Conclusions; References Chapter 4. A New Electron Diffraction Technique, Potentially Applicable

to Research in CatalysisI. Experimental Apparatus; II. Oxygen on Nickel; References; Chapter 5. The Structure and Analysis of Complex Reaction Systems; I. Introduction; II. Reversible Monomolecular Systems; III. The Determination of the Values of the Rate Constants for Typical Reversible Monomolecular Systems Using the Characteristic Directions; IV. Irreversible Monomolecular Systems; V. Miscellaneous Topics Concerning Monomolecular Systems; VI. Pseudo-Mass-Action Systems in Heterogeneous Catalysis VII. Qualitative Features of General Complex Reaction SystemsVIII. General Discussion and Literature Survey; Appendices; I. The Orthogonal Characteristic System; II. Explicit Solution for the General Three Component System; III. A Convenient Method for Computing the Characteristic Vectors and Roots of the Rate Constant Matrix K; IV. Canonical Forms; V. List of Symbols; References; Chapter 6. Catalytic Effects in Isocyanate Reactions; I. Introduction; II. Polymerization of Isocyanates; III. Reactions of Isocyanates with Compounds Containing Active Hydrogen; IV. Applications; References Author IndexSubject Index

Lengua: English

ISBN: 1-281-73890-5 9786611738907 0-08-056517-4

Materia: Catalysis Chemistry, Physical and theoretical

Autores: Eley, D. D. (1911-) Selwood, P. W. (Pierce Wilson) (1905-1986.) Weisz, Paul B. (1921-)

Enlace a serie principal: Advances in catalysis (CKB)954926975030 (DLC)2011233057 (OCoLC)61764781

Enlace a formato físico adicional: 0-12-007813-9
