Título: Advances in applied microbiology. Volume 13 electronic resource] edited by David Perlman

Editorial: New York Academic Press 1970

Descripción física: 1 online resource (509 p.)

Mención de serie: Advances in applied microbiology v. 13

Nota general: Description based upon print version of record

Bibliografía: Includes bibliographical references and index

Contenido: Front Cover; Advances in Applied Microbiology, Volume 13; Copyright Page; Contents; List of Contributors; Preface; Contents of Previous Volumes; Chapter 1. Chemotaxonomic Relationships Among the Basidiomycetes; I. Introduction; II. Macrochemical Color Reactions; III. Other Chemotaxonomic Aids in Fleshy Fungi; References; Chapter 2. Proton Magnetic Resonance Spectroscopy -An Aid in Identification and Chemotaxonomy of Yeasts; I. Introduction; II. Chemotaxonomy of Yeasts According to Their Mannose-Containing Polysaccharides III. Classification of the Yeasts according to the Pmr Spectra of Their Mannose-Containing PolysaccharidesIV. Summary and Conclusions; References; Chapter 3. Large-Scale Cultivation of Mammalian Cells; I. Introduction; II. Selection, Storage, and Maintenance of Cells; III. Production of Culture Media; IV. Mass Cultivation of Cells; V. Conclusions; References; Chapter 4. Large-Scale Bacteriophage Production; I. Introduction; II. General Considerations; III. DNA Bacteriophages; IV. RNA Bacteriophages; V. Bacteriophage-Infected Cells; References Chapter 5. Microorganisms as Potential Sources of FoodI. Introduction; II. Inadequacy of Cereal and Vegetable Protein; III. Desirable Characteristics of Microorganisms; IV. Algae; V. Fungi; VI. Yeast; VII. Lichens; VIII. Bacteria; IX. Chemosynthesis; X. Palatability; XI. Conclusion; References; Chapter 6. Structure-Activity Relationships Among Semisynthetic Cephalosporins; I. Introduction; II. Semisynthetic Cephalosporins; III. Resistance to Cephalosporinases; IV. Pharmacology, Metabolism, and Mode of Action; References; Chapter 7. Structure-Activity Relationships in the Tetracycline Series I. IntroductionII. Basic Structural Requirement for Tetracycline Activity; III. Electronic and Lipophilic Effects on Tetracycline Activity; References; Chapter 8. Microbial Production of Phenazines; I. Introduction; II. Pyocyanine; III. Chlororaphine; IV. Phenazine-1-

Carboxylic Acid; V. Iodin; VI. Other Phenazines; VII. Discussion and Possible Future Studies; References; Chapter 9. The Gibberellin Fermentation; I. Introduction and Scope of Review; II. Gibberellins-Structure and Terminology; III. Other Compounds Isolated from Gibberellin Fermentations IV. Organisms, Nomenclature, and StrainsV. Assay, Extraction, and Purification Methods; VI. The Biosynthesis of Gibberellins; VII. The Course of Fermentation; VIII. The Effects of Environmental Changes on the Course of Fermentation; IX. The Production of Gibberellins; X. Present and Potential Applications; References; Chapter 10. Metabolism of Acylanilide Herbicides; I. Introduction; II. Metabolism of Acylanilides; III. Biological Activity of Metabolites; IV. Concluding Comments; References; Chapter 11. Therapeutic Dentifrices; I. Introduction; II. Plaque- and Calculus-Inhibiting Dentifrices III. Desensitizing Dentifrices

Lengua: English

ISBN: 1-281-40875-1 9786611408756 0-08-056427-5

Materia: Biology Microbiology

Autores: Perlman, David

Enlace a serie principal: Advances in applied microbiology (CKB)954926956842 (DLC)59013823 (OCoLC)1461144

Enlace a formato físico adicional: 0-12-002613-9
