

Acute promyelocytic leukemia : molecular genetics, mouse models and targeted therapy /

Pandolfi, P. P. (Pier Paolo)
Vogt, P. K. (Peter K.) (1932-)

Springer,
2007

Electronic books

Monografía

"This volume is meant to summarize some of the most recent progress made in elucidating the pathogenesis of Acute Promyelocytic Leukemia (APL) and in the treatment of this form of leukemia. It is also meant to celebrate one of the most successful accomplishments in cancer research and contemporary biomedical research."--Jacket

Título: Acute promyelocytic leukemia molecular genetics, mouse models and targeted therapy P.P. Pandolfi and P. K. Vogt (eds.).

Editorial: Berlin New York Springer 2007

Descripción física: 1 online resource (vi, 273 pages) illustrations

Mención de serie: Current topics in microbiology and immunology 0070-217X 313

Documento fuente: Springer e-books

Bibliografía: Includes bibliographical references and index

Contenido: APL as a paradigm in biomedical research : a journey toward the cure / P.P. Pandolfi -- Mouse models of acute promyelocytic leukemia / S.C. Kogan -- The PLZF gene of t(11;17)-associated APL / M.J. McConnell and J.D. Licht -- SUMO, the three Rs and cancer / J.-S. Seeler [and others] -- Emerging role for microRNAs in acute promyelocytic leukemia / C. Nervi [and others] -- The theory of APL revisited / P.P. Scaglioni and P.P. Pandolfi -- Treatment of acute promyelocytic leukemia by retinoids / P. Fenau, Z.Z. Wang, and L. Degos -- Arsenic trioxide and acute promyelocytic leukemia : clinical and biological / Z. Chen [and others] -- Front line clinical trials and minimal residual disease monitoring in acute promyelocytic leukemia / F. Lo-Coco and E. Ammatuna -- Histone deacetylase inhibitors in APL and beyond / K. Petrie, N. Prodomou, and A. Zelent -- Monoclonal antibody therapy

of APL / P.G. Maslak, J.G. Jurcic, and D.A. Scheinberg -- Targeting APL fusion proteins by peptide interference / A. Melnick -- The design of selective and non-selective combination therapy for acute promyelocytic leukemia / Y. Jing and S. Waxman
