

Total recall : the evolution of memory /

Ars Electronica (2013 :.
Linz, Austria)

Hatje Cantz,
2013

Congresos, asambleas, etc.

Monografía

"Total recall is the theme of the 2013 Ars Electronica Festival. In this quest for perfection in recollection, neuroscientists and computer engineers, artists and philosophers will have their say about their approaches, the latest findings, insights, and interpretations, their plans and visions for a future in which we'll be able to store everything to memory." --back cover
