Analítica

Since "Hegemony and socialist strategy", Ernesto Laclau has adopted Claude Leforts understanding of modern democracy regarding his own work. However, in his posterior work and specially in "The populist reason", Laclaus conceptualization of democratic experience confronts with his initial thoughts, causing a rupture with Leforts understanding on the subject. This paper has two objectives. On the one hand, it will try to clarify how Laclau reads Leforts work in "The populist reason", trying to prove that his latter understanding of the democratic experience is -in some aspects- contradictory with that of the French philosopher. On the other hand, it will try to follow Laclaus consideration of populism, in order to understand the indefinition between Populism and Democracy, a subject that has been -in many cases- poorly studied, and represents one of the main theoretical issues regarding populism
