Monografía

"Abstractionism", which is a development of Frege's original Logicism, is a recent and much debated position in the philosophy of mathematics. This volume contains 16 original papers by leading scholars on the philosophical and mathematical aspects of 'Abstractionism'. After an extensive editors' introduction to the topic of 'abstractionism', five contributions deal with the semantics and meta-ontology of 'Abstractionism', as well as the so-called Caesar Problem. Four papers then discuss abstractionist epistemology, focusing on the idea of implicit definitions and non-evidential warrants (entitlements) to account for a priori mathematical knowledge. This is followed by four chapters concerning the mathematics of 'Abstractionism', in particular the issue of impredicativity, the Bad Company objection, and the question of abstractionist set theory. Finally, the last section of the book contains three contributions that discuss Frege's application constraint within an abstractionist setting" --

Título: Abstractionism essays in philosophy of mathematics edited by Philip A. Ebert and Marcus Rossberg

Edición: First Edition

Editorial: Oxford New York, NY Oxford University Press 2016

Descripción física: 1 Recurs en línia (IV, 360 pàgines)

Nota general: Descripció del recurs: 24 de febrer del 2017

Contenido: Conté: Part I : Introduction -- 1. Introduction to Abstractionism / Philip A. Ebert and Marcus Rossberg -- Part II : Semantics and Ontology of Abstraction -- 2. Caesar and Circularity / William Stirton -- 3. The Existence (and Non-existence) of Abstract Objects / Richard G. Heck, Jr. -- 4. Hale and Wright on the Metaontology of Neo-Fregeanism / Matti Eklund -- 5. Neo-Fregean Meta-Ontology: Just Don't Ask Too Many Questions / Fraser MacBride -- 6- The Number of Planets, a Number-Referring Term? / Friederike Moltmann -- Part III : Epistemology of Abstraction -- 7. A Framework for Implicit Definitions and the A Priori / Philip A. Ebert -- 8. Abstraction and Epistemic Entitlement: On the Epistemological Status of Hume's Principle / Crispin Wright -- 9. Hume's Principle and Entitlement: On the Epistemology of the Neo-Fregean Program / Nikolaj Jang Lee Linding Pedersen / 10. Neo-Fregeanism Reconsidered / Agustín Rayo -- Part IV : Mathematics of Abstraction -- 11. Conservativeness, Cardinality, and Bad Company / Roy T. Cook -- 12. Impredicativity in the Neo-Fregean Program

/ Øystein Linnebo -- 13. Abstraction Grounded: A Note on Abstraction and Truth / Hannes Leitgeb -- 14. Ineffability within the Limits of Abstraction Alone / Stewart Shapiro and Gabriel Uzquiano -- Part V : Application Constraint -- 15. On Frege's Applications Constraint / Paul McCallion -- 16. Applications of Complex Numbers and Quaternions: Historical Remarks, with a Note on Clifford Algebra / Peter Simons -- 17. Definitions of Numbers and Their Applications / Bob Hale -- Index
