Monografía

"Interior designers and architects are creating unforgettable spaces and setting stunning new standards for restaurants, bars, and cafes. People love to go out and indulge their senses by trying new restaurants. Pastel colors, hyper-realistic murals, indoor jungles, curved and luxurious couches, golden accents, and soft light. Designers, architects, and restaurateurs transform a night out at a restaurant into a unique and memorable experience. An array of interiors creatively correspond with each particular menu's offerings; Appetizer visits fashionable bars, tasteful eateries, cozy cafes, mobile food trucks and everything in between. Exquisite room concepts are realized with unusual ideas and materials, and experts showcase how to create dream rooms in dining realms. Within Appetizer awaits a range of inspiration for all who wish to satisfy their visual hunger."--
