Bourdon, Amé (1636 or 1638-1706),
artist

Pictorial Work

illustrated books.

Pictorial works.

Illustrated works.

Ouvrages illustrés.

The canvas is devoted to the study of myology. The upper portion of the canvas depicts a human skeleton (96 cm tall) with the main muscles and their insertions on the bones. The lower portion of the canvas includes six smaller figures, depicting the morphology of the heart and lungs, and the structure of the heart atria and heart ventricles, with view of the cardiac cavities
