Analítica

Our article aims to analyze the public policies of beautification of Manaus having, as main sources, a message of governor of 1893 in which Eduardo Ribeiro presents some of his proposals of works to be done during his mandate, but also it presents an annex of a report of the interim's hygiene inspector. In addition, we will use the Code of Municipal Postures of Manaus that same year. We believe that the discussions can give us an overview of the public policies for the hygienic regulation and control of the public space of Manaus, thus demystifying that the plan of beautification of Manaus was restricted to the center of the city and the monumental works. That is, what we want to show is that the modernization plan of Manaus was strictly linked to a sanitation policy
