Monografía

Presenting a stimulating synthesis of rapidly growing research interests and publications by scholars in the field of applied mycology and biotechnology. The surge of research and development activity in applied mycology and fungal biotechnology relates to the need and utility of fungi in many contexts. These contexts are wide in scope, and include agriculture, animal and plant health, biotransformation of organic or inorganic matter, food safety, composition of nutrients and micronutrients, and human and animal infectious disease. Containing a balanced treatment of principles, biotechnologica

Título: Agriculture and food production edited by George G. Khachatourians, Dilip K. Arora

Editorial: New York Elsevier 2001

Descripción física: 1 online resource (445 pages)

Mención de serie: Applied mycology and biotechnology v. 1

Bibliografía: Includes bibliographical references and indexes

Contenido: Front Cover; APPLIED MYCOLOGY AND BIOTECHNOLOGY: AGRICULTURE AND FOOD PRODUCTION; Copyright Page; Preface; Editorial Board for Volume 1; Contents; Chapter 1. Applied mycology and biotechnology for agriculture and foods; Chapter 2. Filamentous fungi- growth and physiology; Chapter 3. Metabolic regulation in fungi; Chapter 4. Protein secretion by fungi; Chapter 5. Significance of fungal peptide secondary metabolites in the agri-food industry; Chapter 6. Plant antifungal peptides and their use in transgenic food crops; Chapter 7. Clustered metabolic pathway genes in filamentous fungi
