Contrastive Linguistics, like other linguistic disciplines, is becoming more and more data-oriented, relying increasingly on the statistical analysis of corpus data to reveal and investigate the similarities and dissimilarities between languages. The volume Corpus Studies in Contrastive Linguistics illustrates this current trend with a representative sample of contrastive linguistic case studies. These cover a range of linguistic phenomena (syntax, modality and discourse) and pursue different types of research questions (grammaticalization, pragmatic function, stylistic function, typological p.
