Monografía

"Donna Leon's bestselling mystery novels have won a multitude of fans for their insider's portrayal of Venice. From family meals to vaporetti rides, the details and rhythms of everyday life are an integral part of this beloved series. But so are the never-ending influx of tourists and the suffocating corruption. Through it all, Leon's Commissario Guido Brunetti, a good man who loves his family and his city, has been an enduring figure, but in *Earthly Remains*, Brunetti's endurance is tested more than ever before. During an interrogation, Brunetti acts rashly, doing something he quickly comes to regret, and in the fallout, he realizes that he needs a break. Granted leave from the Questura, Brunetti's wife Paola ships him off to a villa owned by a wealthy relative on Sant'Erasmo, one of the largest islands in the lagoon. There he intends to pass his days rowing, and his nights reading Pliny's *Natural History*. The recuperative stay goes according to plan until David Casati, the caretaker of the house, goes missing following a sudden storm. Now, Brunetti feels compelled to investigate, to set aside his leave of absence and understand what happened to the man who had become his friend"
