A "Plug-and-Display" Nanoparticle Vaccine Platform Based on Outer Membrane Vesicles Displaying SARS-CoV-2 Receptor-binding Domain

Instructional and Educational Work

Material Proyectable

The present protocol describes the bioengineering of outer membrane vesicles to be a "Plug-and-Display" vaccine platform, including production, purification, bioconjugation, and characterization

Título: A "Plug-and-Display" Nanoparticle Vaccine Platform Based on Outer Membrane Vesicles Displaying SARS-CoV-2 Receptor-binding Domain

Editorial: Cambridge JoVE 2022

Descripción física: 1 online resource (1 video file) sound, color

Mención de serie: Bioengineering. Bioengineering

Intérpretes: Presented by MyJoVE Corporation

Lengua: Presented in English; subtitles in English

Entidades: MyJoVE Corporation production company publisher

Punto acceso adicional serie-Título: Bioengineering. Bioengineering
