Música experimental.

Música

"The 3-dimensional graphic scores used on the album Star System are subsets of the Hayward Tuning Vine, which arose out of a desire to visualise the harmonic space implicit within the microtonal tuba. Each of the balls represent pitches, and the struts between them musical intervals. In Star System (side A), the musicians orbit once around the star-like structure, revealing the harmonic space implicit within it. In Square Dance (side B), the various squares and rectangles within the score are gradually explored by the musicians, analogous to a slow dance through harmonic space." (cubierta posterior)
