Criticism, interpretation, etc.

Monografía

"This volume investigates and illumines the German sixteenth century--the age of the Renaissance, Reformation, and Faust. Bringing old and new research together, this book structures its study of that era around the figure of Faust. The stories about him address a number of definitive issues for his century, in particular, the intersection of Renaissance humanism and Reformation theology, the practice of magic and diabolism, the interplay of fact and fantasy, the juxtaposition of good and evil (or of the spirit and the world), and the submission to or transgression of the moral code"--Provided by publisher
