

The changing face of European identity /

Robyn, Richard (1949-)

Routledge, 2005

Monografía

Drawing upon systematic research using Q Methodology in seven countries - Denmark, France, Germany, the United Kingdom, Italy, Netherlands and Sweden - this volume presents the results of the most extensive effort yet at cross-cultural, subjective assessment of national and supranational identity. The studies attempt to explain how the European Union, as the most visible experiment in mass national identity change in the contemporary world, influences how Europeans think about their political affiliations
