Título: Algal Development electronic resource] Molecular and Cellular Aspects edited by Wolfgang Wiessner, D. G. Robinson, R.C. Starr

Edición: 1st ed. 1987

Editorial: Berlin, Heidelberg Springer Berlin Heidelberg Imprint: Springer 1987

Descripción física: 1 online resource (X, 190 p. 22 illus.).

Variantes del título: Proceedings of the Third Symposium on Experimental Phycology, 1986

Mención de serie: Proceedings in Life Sciences 0172-6625

Nota general: Bibliographic Level Mode of Issuance: Monograph

Contenido: Interaction of Circadian Oscillators and the Cell Developmental Cycle in Euglena -- Control Points in the Chlamydomonas Cell Cycle -- Two Possibilities for Time Measurement in Synchronous Chlorella--Circadian Rhythm and Timing -- Diatom Mitosis: Implications of a Model System -- Wall Morphogenesis in Centric Diatoms -- Cell Elongation in the Red Alga Griffithsia: Control by Light, Ions, and an Endogenous Glycoprotein Hormone -- Molecular Signals During Sexual Induction of Volvox carteri -- Pheromone-Inducible Glycoproteins of the Extracellular Matrix of Volvox and Their Possible Role in Sexual Induction -- Environmental and Pheromonal

Control of Sexual Reproduction in Laminaria (Phaeophyceae) -- Action of Cell Wall Autolysins in Asexual Reproduction of Filamentous Green Algae: Evidence and Species Specificity -- Sexual Agglutination in Chlamydomonas eugametos -- Molecular Recognition Properties of Chlamydomonas HRGP's -- Maturation of a Flagellum/Basal Body Requires More Than One Cell Cycle in Algal Flagellates: Studies on Nephroselmis olivacea (Prasinophyceae) -- Protein Synthesis in Chloroplasts -- Comparison of Envelope Membranes from Higher Plants and Algae Plastids and of Outer Membranes from Cyanobacteria (Blue-Green Algae) -- Regulation of Chloroplast Differentiation: Cooperation Between Light-Induced Processes and Internal Adaptation -- Interaction of Nuclear and Chloroplast Mutations in Biogenesis of Chloroplast Ribosomes in Chlamydomonas -- Evidence for Multiple Functions of the Intrinsic, 32-34 kDa Chloroplast Membrane Polypeptide of Scenedesmus in Photosystem II Reactions -- "Life Cycle" of the 32 kDa-Protein of Chlamydomonas Chloroplasts -- Two Different Forms of LHC in the Green Alga Chlamydotrys stellata -- Taxonomic Index
