Título: Cognitive modeling edited by Thad A. Polk and Colleen M. Seifert

Editorial: 2002

Editorial: Cambridge, Mass. MIT Press 2002

Descripción física: 1 online resource (xxi, 1270 pages) illustrations

Mención de serie: Bradford Books

Nota general: "A Bradford book."

Bibliografía: Includes bibliographical references and index

Contenido: 1.) Role of knowledge in discourse comprehension: a construction-integration model Walter A. Kintsch -- 2.) Act: a simple theory of complex cognition John R. Anderson -- 3.) Preliminary analysis of the soar architecture as a basis for general intelligence Paul S. Rosenbloom, John E. Laird, Allen Newell, and Robert McCarr -- 4.) Adaptive executive control: flexible multiple-task performance without pervasive immutable response-selection bottlenecks David E. Meyer [and others] -- 5.) Capacity theory of comprehension: individual differences in working memory Marcel A. Just and Patricia A. Carpenter -- 6.) How neural networks learn from experience Geoffrey E. Hinton -- 7.) Hopfield model John Hertz, Anders Krogh, and Richard G. Palmer -- 8.) Learning representations by back-propagating errors David E. Rumelhart, Geoffrey E. Hinton, and Ronald J. Williams -- 9.) Forward models: supervised learning with a distal teacher Michael I. Jordan and David E. Rumelhart -- 10.) Finding structure in Time Jeffrey L. Elman -- 11.) Self-organizing neural network for supervised learning, recognition, and prediction Gail A. Carpenter and Stephen Grossberg -- 12.) Optimality: from neural networks to universal grammar Alan Prince and Paul Smolensky -- 13.) Dynamic binding in a neural network for shape recognition John E. Hummel and Irving Biederman -- 15.) End of the line for a brain-damaged model of unilateral neglect Michael C. Mozer, Peter W. Halligan, and John C. Marshall -- 16.) Integrated theory of list memory John R. Anderson, Dan Bothell, Christian Lebiere, and Michael Matessa -- 17.) Why there are complementary learning systems in hippocampus and neocortex: insights from the successes and failures of

connectionist models of learning and memory James L. McClelland, Bruce L. McNaughton, and Randall C. O'Reilly -- 18.) ALCOVE: an exemplar-based connectionist model of category learning John K. Kruschke -- 19.) How people learn to skip steps Stephen B. Blessing and John R. Anderson -- 20.) Acquisition of children's addition strategies: a model of impasse-free, knowledge-level learning Randolph M. Jones and Kurt Van Lehn -- 21.) Learning from a connectionist model of the acquisition of the English past tense Kim Plunkett and Virginia A. Marchman -- 22.) Acquiring the mapping from meaning to sounds Garrison W. Cottrell and Kim plunkett -- 23.) Understanding normal and impaired word reading: computational principles in quasi-regular domains David C. Plaut, James L. McClelland, Mark S. Seidenberg, and Karalyn Patterson -- 24.) Language production and serial order: a functional analysis and a model Gary S. Dell, Lisa K. Burger, and William R. Svec -- 25.) Interference in short-term memory: the magical number two (or three) in sentence processing Richard L. Lewis -- 26.) Similarity, interactive activation, and mapping: an overview Robert L. Goldstone and Douglas L. Medin -- 27.) Analogical mapping by constraint satisfaction Keith J. Holyoak and Paul Thagard -- 28.) MAC/FAC: a model of similarity-based retrieval Kenneth D. Forbus, Dedre Gentner, and Keith Law -- 29.) Distributed representations of structure: a theory of analogical access and mapping John E. Hummel and Keith J. Holyoak -- 30.) Case-based learning: predictive features in indexing Colleen M. Seifert [and others] -- 31.) Feature-based induction Steven A. Sloman -- 32.) Deduction as verbal reasoning Thad A. Polk and Allen Newell -- 33.) Project Ernestine: validating a GOMS analysis for predicting and explaining real-world task performance Wayne D. Gray, Bonnie E. John, and Michael E. Atwood -- 34.) Connectionism and the problem of systematicity (continued): why Smolensky's solution still doesn't work Jerry Fodor -- 35.) Networks and theories: the place of connectionism in cognitive science Michael C. McCloskey -- 36.) Neuropsychological inference with an interactive brain: a critique of the "locality" assumption Martha J. Farah -- 37.) Is human cognition adaptive? John R. Anderson -- 38.) Précis of Unified Theories of Cognition Allen Newell
