Monografía

For ten years, a secret society has risen to power. They have infiltrated every facet of the federal government. They have extraordinary access to public funds and government technologies. They have sought to destroy economic freedom, and create mass dependency. They call themselves THE THREAD. And, they are posed to rise to power. But, on the eve of their burst into power, a copy of their plan falls into hands of a young man in the Utah State Capitol building. Now, the race is on. A small group must struggle to preserve their lives, their nation, and freedom itself
