

Social and Economic Networks in Cooperative Game Theory /

Slikker, Marco

Springer US,
2001

Monografía

Social and Economic Networks in Cooperative Game Theory presents a coherent overview of theoretical literature that studies the influence and formation of networks in social and economic situations in which the relations between participants who are not included in a particular participant's network are not of consequence to this participant. The material is organized in two parts. In Part I the authors concentrate on the question how network structures affect economic outcomes. Part II of the book presents the formation of networks by agents who engage in a network-formation process to be able to realize the possible gains from cooperation

Título: Social and Economic Networks in Cooperative Game Theory by Marco Slikker, Anne Nouweland

Editorial: Boston, MA Springer US 2001

Descripción física: 1 online resource (xi, 294 pages)

Mención de serie: Theory and Decision Library, Series C: Game Theory, Mathematical Programming and Operations Research 0924-6126 27

Contenido: I Social and Economic Networks in Cooperative Situations -- 1. Games and Networks -- 2. Restricted Cooperation in Games -- 3. Inheritance of Properties in Communication Situations -- 4. Variants on the Basic Model -- II Network Formation -- 5. Noncooperative Games -- 6. A Network-Formation Model in Extensive Form -- 7. A Network-Formation Model in Strategic Form -- 8. Network Formation with Costs for Establishing Links -- 9. A One-Stage Model of Network Formation and Payoff Division -- 10. Network Formation and Potential Games -- 11. Net Work Formation and Reward Functions -- References -- Notations
