Monografía

"When Jennifer Hayden was diagnosed with breast cancer at the age of 43, she realized that her tits told a story. Across a lifetime, they'd held so many meanings: hope and fear, pride and embarrassment, life and death. And then they were gone. Now, their story has become a way of understanding her story: a journey from the innocence of youth to the chaos of adulthood, through her mother's mastectomy, her father's mistress, her husband's music, and the endlessly evolving definition of family. As cancer strikes three different lives, some relationships crumble while others emerge even stronger, and this sarcastic child of the '70s finally finds a goddess she can believe in"--
