

Wingender Hovenier Architecten : Amsterdam /

Rosbottom, Daniel

Quart Verlag,
2012

Monografía

After the highly acclaimed Dutch architectural scene in the 1990s, a second generation of architects has formed, whose buildings less spectacular, but designed more sophisticated and attentive to the site and its surroundings are. Important representatives of this younger generation, Jan Peter Wingender Hovenier and Joost are in Amsterdam. Their buildings respond pointedly to the ambient and paste into a sonorous resonance of the respective site-specific mood
