Monografía

Attention and Implicit Learning provides a comprehensive overview of the research conducted in this area. The book is conceived as a multidisciplinary forum of discussion on the question of whether implicit learning may be depicted as a process that runs independently of attention. The volume also deals with the complementary question of whether implicit learning affects the dynamics of attention, and it addresses these questions from perspectives that range from functional to neuroscientific and computational approaches. The view of implicit learning that arises from these pages is not that of a mysterious faculty, but rather that of an elementary ability of the cognitive systems to extract the structure of their environment as it appears directly through experience, and regardless of any intention to do so. Implicit learning, thus, is taken to be a process that may shape not only our behavior, but also our representations of the world, our attentional functions, and even our conscious experience. Título: Attention and implicit learning edited by Luis Jiménez

Editorial: Amsterdam, Netherlands Philadelphia, PA John Benjamins Pub. 2003

Descripción física: 1 online resource (x, 383 pages) illustrations

Mención de serie: Advances in consciousness research 1381-589X v. 48

Bibliografía: Includes bibliographical references and index

Contenido: Attention and awareness in "implicit" sequence learning / David R. Shanks -- Intention, attention, and consciousness in probabilistic sequence learning / Luis Jimenez -- Neural structures that support implicit sequence learning / Eliot Hazeltine and Richard B. Ivry -- Cognitive neuroscience of implicit category learning / F. Gregory Ashby and Michael B. Casale -- Structure and function in sequence learning / Peter F. Dominey -- Temporal effects in sequence learning / Arnaud Destrebecqz and Axel Cleeremans -- Implicit and explicit learning in a unified architecture of cognition / Dieter Wallach and Christian Lebiere -- Visual orienting, learning and conscious awareness / Tony Lambert -- Contextual cueing / Yuhong Jiang and Marvin M. Chun -- Attention and implicit

memory / Neil W. Mulligan and Alan S. Brown -- Verbal report of incidentally experienced environmental regularity / Peter A. Frensch [and others]
