Monografía

Panel data - information gathered from the same individuals or units at several different points in time - are commonly used in the social sciences to test theories of individual and social change. This book highlights the developments in this technique in a range of disciplines and analytic traditions

Título: Causal analysis with panel data Steven E. Finkel

Editorial: Thousand Oaks, Calif. Sage Publications 1995

Descripción física: 1 online resource (vi, 98 pages) illustrations

Tipo Audiovisual: Social sciences Mathematical models

Mención de serie: Sage university papers series. Quantitative applications in the social sciences no. 07-105

Bibliografía: Includes bibliographical references (pages 93-96)

Contenido: 1. Introduction -- 2. Modeling change with panel data -- Change-score models and the role of lagged endogenous variables -- Estimation of the static-score model -- Alternative lag specifications -- Problems in the estimation of panel models -- 3. Models of reciprocal causation -- Cross-lagged effects models -- Synchronous effects models -- Cross-lagged and synchronous effects models -- 4. Measurement error models -- Basic concepts -- Single-indicator models -- Multiple-indicator models -- 5. Spurious association and autocorrelated disturbances -- Common factor models -- Unmeasured variable models -- 6. Concluding note on causal inference in panel analysis
