

Loglinear models with latent variables /

Hagenaars, Jacques A.

Sage,
1993

Monografía

This title shows how uniting ordinary loglinear analysis and latent class analysis into a general loglinear model with latent variables can result in a modified LISREL approach. This modified LISREL model will enable researchers to analyze categorical data in the same way that they have been able to use LISREL to analyze continuous data

Título: Loglinear models with latent variables Jacques A. Hagenaars

Editorial: Newbury Park, Calif. Sage 1993

Descripción física: 1 online resource (iv, 75 pages) illustrations

Tipo Audiovisual: Statistical models

Mención de serie: A Sage university papers series. Quantitative applications in the social sciences 07-094

Bibliografía: Includes bibliographical references (pages 69-73)

Contenido: The loglinear model -- The latent class model -- Loglinear modeling with latent variables: internalizing external variables -- Causal models with latent variables: a modified LISREL approach -- Latent variable models for longitudinal data -- Problems and new developments

Lengua: English
