Título: Actuarial mathematics for life contingent risks David C.M. Dickson, Mary R. Hardy, Howard R. Waters

Edición: 1st pub., 6th pr

Editorial: Cambridge Cambridge University Press 2012

Descripción física: xvii, 493 p. ill. 24 cm

Mención de serie: International series on actuarial science

Bibliografía: Includes bibliographical references and index

Contenido: Preface; 1. Introduction to life insurance; 2. Survival models; 3. Life tables and selection; 4. Insurance benefits; 5. Annuities; 6. Premium calculation; 7. Policy values; 8. Multiple state models; 9. Pension mathematics; 10. Interest rate risk; 11. Emerging costs for traditional life insurance; 12. Emerging costs for equity-linked insurance; 13. Option pricing; 14. Embedded options; A. Probability theory; B. Numerical techniques; C. Simulation; References; Index

ISBN: 9780521118255 p1s40.00

Materia: Matemáticas actuariales Riesgo (Seguros)- Matemáticas

Autores: Hardy, Mary (1958-) Waters, H. R. (Howard Richard)
