

Bioethics and organ transplantation in a Muslim society [a study in culture, ethnography, and religion /

Moazam, Farhat

Indiana University Press,
c2006

Monografía

This is an ethnographic study of live, related kidney donation in Pakistan, based on Farhat Moazam's participant-observer research conducted at a public hospital. Her narrative is both a "thick" description of renal transplant cases and the cultural, ethical, and family conflicts that accompany them, and an object lesson in comparative bioethics
