Libros electrónicos

Monografía

Composite Materials is a modern reference book, tutorial in style, covering functions of composites relating to applications in electronic packaging, thermal management, smart structures and other timely technologies rarely covered in existing books on composites. It also treats materials with polymer, metal, cement, carbon and ceramics matrices, contrasting with others that emphasise polymer-matrix composites. This functional approach will be useful to both practitioners and students. A good selection of example problems, solutions and figures, together with a new and vibrant approach, provides a valuable reference source for all engineers working with composite materials

Título: Composite Materials recurso electrónico] Functional Materials for Modern Technologies by Deborah D. L. Chung

Editorial: London Springer London Imprint: Springer 2003

Descripción física: XIII, 289 p. online resource

Mención de serie: Chemistry and Materials Science (Springer-11644) Engineering Materials and Processes 1619-0181

Documento fuente: Springer eBooks

Contenido: 1 Applications of composite materials -- 2 Science of composite materials -- 3 Composite materials for thermal applications -- 4 Composite materials for electrical applications -- 5 Composite materials for electromagnetic applications -- 6 Composite materials for thermoelectric applications -- 7 Composite materials for dielectric applications -- 8 Composite materials for optical applications -- 9 Composite materials for magnetic applications -- 10 Composite materials for electrochemical applications -- 11 Composite materials for biomedical applications -- 12 Composite materials for vibration damping -- 13 Intrinsically smart structural composites

ISBN: 9781447137320 978-1-4471-3732-0

Materia: Polymers Surfaces (Physics)

Entidades: SpringerLink (Online service)

Enlace a formato físico adicional: Printed edition 9781447137344
