Monografía

This book constitutes the thoroughly refereed post-conference proceedings of the First International Joint Conference on Green Communication and Networking (GreeNets 2011), held in Colmar, France, on October 5-7, 2011. The 16 revised full papers presented were carefully selected and reviewed from numerous submissions and explain the scope and challenges of designing, building, and deploying GreeNets. In this regard, the conference aims to establish a forum to bring together research professionals from diverse fields including green mobile networks, system architectures, networking & communication protocols, applications, test-bed and prototype, traffic balance and energy-efficient cooperation transmission, system and application issues related to GreenNets

Título: Green Communications and Networking [Recurso electrónico] First International Conference, GreeNets 2011, Colmar, France, October 5-7, 2011, Revised Selected Papers edited by Joel J. P. C. Rodrigues, Liang Zhou, Min Chen, Aravind Kailas

Editorial: Berlin, Heidelberg Springer Berlin Heidelberg Imprint: Springer 2012

Descripción física: XII, 197 p. digital

Mención de serie: Lecture Notes of the Institute for Computer Sciences, Social Informatics and Telecommunications Engineering 1867-8211 51

Documento fuente: Springer eBooks

Contenido: A New Energy Prediction Approach for Intrusion Detection in Cluster-Based Wireless Sensor Networks -- A Smart Appliance Management System with Current Clustering Algorithm in Home Network -- A Flexible Boundary Sensing Model for Group Target Tracking in Wireless Sensor Networks -- Green Femtocell Networking with IEEE 802.16m Low Duty Operation Mode -- An Android Multimedia Framework Based on GStreamer -- Bandwidth Aware Application Partitioning for Computation Offloading on Mobile Devices -- A Content-Centric Architecture for Green Networking in IEEE 802.11 MANETs -- TOA Ranging Using Real Time Application Interface (RTAI) in IEEE 802.11 Networks -- Power Reduction in WDM Mesh Networks Using Grooming Strategies -- Power Consumption Analysis of Data Center -- Gradient Optimisation for Network Power Consumption -- On Multipath Transmission Scheduling in Cognitive Radio Mesh Networks -- On the Use of Cooperation as an Energy-Saving Incentive in Ad Hoc Wireless Networks -- Cooperation Policy Selection for Energy-Constrained Ad Hoc Networks Using Correlated Equilibrium -- Energy- and Spectral-Efficient Wireless Cellular Networks -- Energy Packet Networks: ICT Based Energy Allocation and Storage
