Monografía

This volume contains the edited lecture notes of the Second JETSET School on Jets from Young Stars: Clues from High Angular Resolution Observations organised by the Marie Curie Research Training Network JETSET: Jet Simulations, Experiments and Theory. After the opening two chapters on jet emission, readers can learn the fundamental background of modern high-spatial-resolution techniques, and how such methods have impacted on our understanding of young stars. The lectures provide hands-on insight into Observing from space, e.g. from HST and in the future JWST, and from the ground with adaptive optics, The use of interferometers at millimetre and infrared wavelengths, Spectro-astrometry Image analysis and spectral diagnostic techniques High-Angular Resolution studies of the inner regions of circumstellar disks, which play a fundamental role in jet launching. The books' practical approach makes it an outstanding and extremely useful textbook for PhD students and young researchers in astronomy

**Título:** Jets from Young Stars II [Recurso electrónico] Clues from High Angular Resolution Observations edited by Francesca Bacciotti, Leonardo Testi, Emma Whelan

**Editorial:** Berlin, Heidelberg Springer Berlin Heidelberg 2008

**Descripción física:** digital

**Mención de serie:** Lecture Notes in Physics 0075-8450 742

**Documento fuente:** Springer eBooks

**Contenido:** Jet Emission -- Adaptive Optics, HST and Spectro-Astronomy -- Interferometry: Technique and Applications

**Restricciones de acceso:** Acceso restringido a miembros del Consorcio de Bibliotecas Universitarias de Andalucía

**Detalles del sistema:** Modo de acceso: World Wide Web

**Fuente de adquisición directa:** Springer (Phys)

**ISBN:** 9783540680321 978-3-540-68032-1 9783540680314 ed. impresa)

**Autores:** Testi, Leonardo Whelan, Emma

**Entidades:** SpringerLink (Online service)
