

Jews and gender in liberation France [

Adler, K. H. (Karen H.)

Cambridge University Press,
2003

Monografía

"This book takes a new look at occupied and liberated France through the dual prism of race, specifically Jewishness, and gender--core components of Vichy ideology. Imagining liberation, and the potential post-Vichy state, lay at the heart of resistance strategy. The development of these ideas, and their transformation into policy at liberation, form the basis of an enquiry that reveals a society which, while split deeply at the political level, found considerable agreement over questions of race, the family and gender. This is explained through a new analysis of republican assimilation which insists that gender was as important a factor as nationality or ethnicity. A new concept of the 'long liberation' provides a framework for understanding the continuing influence of the liberation in post-war France, where scientific planning came to the fore, but whose exponents were profoundly imbued with reductive beliefs about Jews and women that were familiar during Vichy."--
